EXPERIENCE JERUSALEM

For the First Time on the Giant Screen!

JERUSALEM takes audiences on a visually stunning tour of one of the world's oldest and most enigmatic cities. Destroyed and rebuilt countless times over 5,000 years, Jerusalem's enduring appeal remains a something of a mystery. What made it so important to so many different cultures? How did it become the center of the world for three major religions? Why does it still matter?

JERUSALEM attempts to answer these questions and more as it follows three young Jerusalemites and their families – Jewish, Christian and Muslim – as they celebrate the seasons of the city. Through their eyes, audiences learn what it means to call Jerusalem home, experiencing the vibrance, the beauty, the rhythms, and the very beating heart of the city.

JERUSALEM also follows noted archaeologist Dr. Jodi Magness as she explores some of the most extraordinary historical sites in the region in order to better understand how Jerusalem became the crossroads of civilization.

Director Daniel Ferguson and his crew were given unprecedented access to Jerusalem's most sacred sites to create an intimate and engaging portrait of the city, complemented by stunning, never-before-seen aerial photography that will leave audiences in awe of the beauty and majesty of both the city and the region in which it lies.

National Geographic is proud to be presenting **JERUSALEM** on the world's largest screens. Promotional assets for this film include a full complement of marketing and educational materials as well as an aggressive grassroots outreach campaign in local markets. Don't miss the opportunity to give your audiences a breathtaking and unprecedented look at this amazing and enchanting city, the "beating heart of the world."

JERUSALEM is available in 3D, 2D, 15/70, Digital and IMAX® Digital formats.
